D342
Saniter 20-16-4

D725-7-16 from the Chairman M.D.S. Committee Hassan

A brief report on the working of Malnad Improvement Scheme in the Hassan District during the year 1915-16.

---&&&---

Clearance of rank vegetation, etc.

(Cotton)

No fresh estimate was sanctioned during the year and only a sum of Rs.137-10-0 was spent towards 14 works under the head sanctioned last year. According to the opinion of the Committee, that Government money should be sparingly spent on these works, a good deal of these sanctioned works as also an extent of about 508 acres in 173 villages were got cleared of rank vegetation by the villagers themselves without any cost to Government. The annexed statement No I shows the number of works sanctioned since the commencement of the operations and also the extent to which Government money was spent on these works both during the year 1914-15 and during the year under report.

2. Drinking water wells:

During the year under review, 19 wells at an estimated cost of about R$. 11,000/- were sanctioned in addition to the twelve works of last year. Of the 31 works, 30 wells were actually started and by the end of the year, 16 wells were completed. Ten more wells would have been completed had it not been for the difficulty and inconvenience experienced in getting blasting materials. A sum of Rs.5,926-13-3 was spent on these works during the year and the enclosed statement No.II gives the particulars regarding the progress of the works.

3. Drainage works:

A sum of Rs.260-6-6 was paid during the year on account of ten sanctioned works of last year. Nine out of these ten works were completed by the end of the year under report The progress of these works is given in the accompanying statement No.III.

4. Road Works:

For the improvement to Hiriyur-Magalu road in the

Manjarabad Taluk which was sanctioned in the preceding year but continued to be in progress during the year, a sum of Rs.251-8-0 was paid and the work is now completed. Five more village roads in the Manjarabad and Arkalgud Taluks were taken for investigation and the same will be put on hand after the contribution amount promised by the ryots is realised.

5. Promotion of Vaccination:

Three candidates that were deputed for training in Vaccination were employed after their return from training just before the beginning of the year under report in addition to the one Vaccinator already employed for Saklespur. The services of this additional vaccinator of Saklespur were dispensed with in August 1915. Thus there were four vaccinators at work till the end of August and only three continued till the end of the year. Total number of cases done by these special vaccinators during the year is 1,705.

6. Increased aid by Midwives:

Out of the four candidates deputed for training in midwifery last year, one was withdrawn in April 1915 and in her stead, another was sent in April 1916. Of these candidates, two returned after completing their course of training and were employed as special midwives on Rs.15 plus 5 per mensem, in February 1916. They stand now posted for duty at Arehalli and Sukravarasante and have attended to 10 labour cases during the year.

7. Establishment of dispensaries:

Of the two itinerant dispensaries sanctioned to the district, Government ordered the opening of only one during the year and a sum of Rs.5,000/- was provided towards the cost of its maintenance. The dispensary which has been opened in the Ballur village and which has commenced its work only from June 1916, has become very popular, the average daily attendance being about 50. The Medical

Officer in charge of the dispensary is constantly on the move in the neighbourhood and the villagers are grateful to Government for having sanctioned the dispensary, ~~providing thereby the medical aid to them at their own doors.~~

8. Distribution of Quinine:

In addition to 17,442 powder packets and 20,000 tablets of 5 grs. each distributed last year about 40,000 tablets were got and distributed free among the villagers during the year under report. The drug has proved very efficacious and the use of it is very much appreciated by the people.

9. Spread of knowledge on Sanitation:

Of the 8,000 copies printed of each of the Kannada and English pamphlets on " Quinine in the Treatment of Malaria " and on " Small-pox and Vaccination " brought out by Mr. M.G. Samuel, 3,000 copies of each were distributed in the malnad parts of the district by the staff of the Department, explaining to the people the subject matter of the leaflet and giving such supplementary instructions regarding the use of quinine and the benefits of vaccination,, against malaria and small-pox.

10. Itinerant lecturers:

The Executive staff and the Special Sanitary Officers are regularly imparting instructions to the villagers by way of friendly talk on all matters conducive to the several improvements of the Malnad. The services of the itinerant lecturer employed by the Economic Conference are being availed of and he has delivered a number of lectures in the Malnad villages chiefly on subjects pertaining to the social, economic and hygenic conditions of the people.

11. Shifting or extensions of villages:

In addition to 21 villages dealtwith last year, 12 more were taken during the year, mainly in the Arkalgud Taluk. People are coming forward to offer contribution towards the cost of the lands to be acquired for the purpose and the people in three villages in the Arkalgud Taluk have already

(12

contributed about Rs.250/- and the amount has been deposite in the Taluk Treasury. In 10 villages people have already built houses on the new sites and with regard to the remain ing villages, the records relating to the acquisition or alienation proceedings in respect of the lands selected for the purpose are in varicus stages of progress.

12. Allotment and expenditure:

The accompanying statement No.IV, shows the allotment and expenditure during the year under report. It may be noted that the figures for expenditure under some heads are only probable and approximate as the details of inform tion regarding several items are not available in this -- Office.

P Ramasamy Rao

Special Revenue Officer,

M.I.S.Kadur & Hassan Dists.

No.

Enclosure No. Report in triplicate

Submitting brief report on the Malnad Improvement Scheme for 1915-1916 in triplicate

D 343 / TC

A brief report on the working of the Malnad Improvement Scheme in the Kadur District during the year 1915-16.

Received with D.O. letter No. 50/247/16 dated 20-6-16 from the President Kadur Dt. Committee Chikmagalur

Clearance of rank vegetation, etc:

Two fresh works at an estimated cost of Rs.137/- were sanctioned during the year as a special case in addition to 16 works of last year. Payments to an extent of Rs.232-11-7 were made towards the above works and in accordance with the opinion of the Committee that Govt: money should not be spent on these works except in special cases, the villagers were induced to take up works of this nature themselves and carry them out without any cost to Govt: and accordingly in 178 villages about 912 acres were cleared of rank vegetation by the villagers and the value of work so turned out is estimated at Rs.11,720. The enclosed statement No.I shows the progress of works under this head during the year under review.

(Note)

2. Providing good drinking water:

During the year, 26 fresh well works as also two water supply projects to Indavara and Bollebyle with the preliminary survey -- work thereto were sanctioned in addition to 23 well works of last year. In all 52 works at an estimated cost of about Rs.31000/- were sanctioned since the inception of the Scheme and out of 37 wells actually started, 28 were completed by the end of the year. Twenty more wells would have been undertaken and completed, had it not been for the difficulty of getting the timely supply of blasting materials as also of procuring reliable well-work contractors. The survey work relating to the two water supply projects were also completed and the projects themselves will be taken up for execution during the ensuing year. A sum of Rs.750/- has been promised by the Indavara villagers as contribution towards the cost of the project. Rs.200 have already been collected and credited into the Taluk Treasury.

The question of water supply to Kalasa town which was investi-gated by the Superintending Engineer long ago, was for some --- reason or other not taken up and when the correspondence on the subject was re-started by this Office, Government sanctioned the

the project at a cost of nearly Rs.25,000/- and ordered that it should be worked by Public Works Department agency.

The water Supply Project to Balehonnur town is being taken up for investigation and plans and estimates will be prepared and laid before the Committee for sanction as soon as the contribution to an extent of at least 50 % of the cost is realised. The annexdd statement No.II gives the progress of works under the head during the year.

3. Drainage Works:

Six new works at a cost of Rs.1860/- were sanctioned during the year. Of the twelve works sanctioned since the beginning, 11 were actually started and 10 were completed by the end of the year. A sum of Rs.1276-14-3 was paid on the works under the head and the progress of these works is shown in the accompanying statement No.III.

4. Road Works:

In all 10 works were sanctioned under the head since the commencement including three bridge works at a cost of Rs.2780/- as also the preliminary survey work to a bridge across Anebiddahalla and to a loop road connecting Tarikere-Augumbe road with Thirthahalli-Augumbe road in the Koppa Taluk. In respect of the last-named road, people have contributed to an extent of Rs.1000 and the amount is deposited in the Koppa Taluk Treasury. The improvement to 4 village roads were completed and three more road works were taken up for investigation. They will actually be taken on hand after the contribution promised by the ryots is collected. The details of progress of works under the head are given in the enclosed statement No.IV.

5. Special grant to Institutions:

A special grant of Rs.30/- per mensem which was sanctioned last year in aid of Mrs. Slater's Dispensary for women and Children at Chikmagalur was continued during the year.

6. Promotion of Vaccination:

Three candidates deputed for training in Vaccination last year were employed after their return from training just before the beginning of the year and they have done 654 cases during

7. Increased aid by Midwives:

In addition to the three candidates deputed for training i midwifery last year, three more were sent during the year of wh one is reported to have resigned in May last. The employment o three additional midwives was sanctioned last year and two were accordingly entertained in February and March 1915 and posted t Lingadahalli and Lukvalli of Tarikere Taluk. The midwife poste to Lingadahalli was subsequently transferred to Aldur, Chikmaga lur Taluk in May 1915. These two midwives together with the on appointed for Hariharpur who joined duty in February 1916 conti nued to work during the year. One woman has returned from trai ing and recommendation has been made to Govt: for her employmen and posting to Balehonnur. The three midwives attended to 60 labour cases during the year under report.

8. Establishment of dispensaries:

On the proposal of the Committee to open stationary dispensaries in the marginally noted six places, Govt: called for information regarding the accommodation available and cost etc., regarding dispensaries contemplated to be opened immediately at Balur, Aldur and Attigundi and necessary information was furnished in the matter in consultation with the Senior Surgeon. Upon this Government ordered the postponement of the question to the ensuing year and directed that suitable provision be made there for in the budget estimates for 1916-17 in consultation with the District Board. Government order was duly attended to and necessary funds have been asked for in the budget relating to the M.I Scheme as the District Board pleaded inability to set apart any portion of their funds for the purpose.

1.Lukvalli, 2.Balur, 3.Aldur, 4.Attigundi, 5. Santaveri & 6. Sangameswarapet.....

9. Distribution of Quinine:

In addition to 30,000 powder packets, about 90,000 tablets of 5 grs, each and 5 lbs. sulphus were got distributed free in all the villages of the Malnad parts of the district since the commencement of the operations. The drug has proved itself very efficacious and the use of it which was looked on by the villagers with considerable disfavour at the beginning has become

very popular so much so that it is found difficult to meet the demand for the same.

10. Spread of knowledge on Sanitation:

Of the 8,000 copies printed of each of the four pamphlets both in Kannada and English on " Quinine in the Treatment of Malaria " and on " Small-pox and Vaccination " by Mr. M.G.Samuel, 5000 copies of each were distributed by the staff of the Department in all the Malnad villages, explaining the subject matter of the leaflets and also issuing supplementary instructions to the people on the use of quinine and benefits of vaccination -- against malaria and small-pox respectively.

11. Itinerant lecturers:

The executive staff of the Department and the District Sanitary Officer continued to impart instructions to the villagers on all matters relating to general sanitation. The undersigned has also been systematically giving, by way of friendly talk, necessary advice to the village-folk on their hygenic conditions and improvements in general. The services of the itinerant lecturer employed by the Economic Conference have been availed of and he has delivered a number of lectures in the villages on subjects relating to moral, social and economic conditions of the Malnad.

12. Shifting or extensions of villages:

In addition to 13 villages dealt with last year, 9 more villages were taken up during the year, thus bringing the total number of villages dealt with under the head since the commencement to 22. In 12 of these villages, people have already built houses on the new sites and in respect of the remaining villages records relating to the acquisition or alienation proceedings are in various stages of progress. Lands to an extent of 4 acres and 4 guntas ~~xxx~~ in the Thegur village and 3 acres and 14 guntas in the Sangameswarapet village of the Chikmagalur Taluk were recently acquired at a cost of Rs.357-12-0 as compensation to the owners and the same was made available to the people for building purposes. The villagers of Thegur have contributed a sum of Rs.150/- towards the cost of the site.

22

13. Attraction of Settlers:

Some twenty families have come and settled down in the ~~Kuch~~ Bechirak village of Shantipur in the Tarikere Taluk. About 30 families from the Vellore side and some Mahratta families from the Bellary district have newly come settled down in the villages of Kusavalakki sheds and Sangameswarapet respectively. --- Every facility is being given to these new settlers by free grant of building sites and materials as also wells etc. Steps have also been taken to give them lands on reasonable concessions.

14. Allotment and Expenditure:

The particulars relating to the allotment sanctioned and expenditure incurred during the year on account of the Scheme are given in the appended statement No.VI. It may be noted here that the figures relating to cost of establishment, stipends to midwives and vaccinators, etc, are only probable and approximate as accurate information regarding several items thereof are not available in this Office, besides items of expenditure being adjusted between department and department by means of book transfer in the Comptroller's Office.

From the Chairman M.D. Committee
Shimoga Dt.

A brief report on the working of the Malnad Improvement Scheme during the year 1915-16.

Charge of Office.

Mr. Ananda Rao, S. Sirsi, who was in charge of the Office of the Malnad Improvement Committee, since the begin ning of the Scheme was transferred to the Revenue Department and was succeeded by Mr. S.N. Appanna Iyengar, B.A., B.L., on the 11th August 1915 as per notification No. G. 1201 G.M. 82-15-5 dated 27th July 1915.

Committee.

The strength of the Committee was raised from 12 to 14 members inclusive of the Chairman and the Secretary as per sanction conveyed by Government in their Order No. 3322-33 Sany. 39-15-2 dated 3rd November 1915. It consists of nine officials and five non-official members. Six meetings were convened during the year 1915-16 and the attend-ance of the members was uniformly - - satisfactory.

Area under the operation of the Malnad Improvement Scheme.

The Kasaba and Benkipur hoblies of the Shimoga Taluk, the remaining portions of the Kumsi Sub-Taluk to the right of the Bangalore-Honnavar road, 17 villages of Chinikatte magani in the Belagutti hobli of the Honnali - -

Taluk

(30)

Taluk and 38 villages of the Channagiri Taluk in the Ubrani and Basavapattana hoblies were ordered to be brought under the operations of the Malnad Improvement Scheme as per sanction of Government conveyed in their Order No. 1175-9 Sany. 103-14-8 dated 11th August 1915. Almost the whole of the district is now under the - - Scheme.

Allotment for the year.

A sum of Rs 50,000/- was placed at the disposal of the Committee by the Government for expenditure on works connected with the Malnad Improvements as also for the cost of execution of the same. Further, a sum of Rs 5,000/- was also placed at the disposal of the Committee during the latter part of the year for expenditure in connection - - with the grant of loans to new settlers for the purchase of agricultural stock and implements. The total allotment for the year was Rs 55,000/-. Appendix A is the statement showing the distribution of allotment for several item of work and expenditure during the year 1915-16 as also of lapses. The - - - reasons for lapses under some of the items have been explained in the remarks colum of the statement.

Measures undertaken by the Malnad Improvement Committee.

The Committee agreeing with the views of the Government in the matter of the use of the public funds to - -

Clearance of rank vegetation

restricted

and encouraging people to undertake it.

restricted purposes, made no provision in its budget for expenditure towards the cost of clearance of rank vegetation. The ryots were encouraged to take up this work by themselves without any aid from Government and such work was undertaken by the ryots of 115 villages during the year. Besides the ryots of 26 villages, which were selected for the work of clearance of rank vegetation in the previous year, also came forward to complete the portion of the work remaining to be done at their own cost. The number of villages dealt with during the year under report is 141, the number dealt with since the introduction of the scheme being 219. The number of villages is largest in the malnad taluks of Sagar, Nagar and Tirthahalli being 48, 46 and 43 respectively. The value of work done by the ryots of their own accord is estimated at Rs 5715-10-2 The average cost of clearance of rank vegetation from enquiries made and from practical experience is ascertained to be Rs 20 to 25 per acre. At this rate the area cleared during the year is more than 230 acres. The ryots have been realizing the advantages of the clearance of rank vegetation in and around the inhabited villages and are coming forward to take up the work themselves.

themselves.

As a special case, an estimate for Rs 148/- was sanctioned during the year under report towards the ~~xxxxxx~~ clearance of rank vegetation on the new site selected for the construction of houses by the settlers at Mumbal village in the Sagar Taluk. The settlers also co-operated in this work and the value of work turned out by them is reported to be more than - - Rs 200/-. The sanctioned estimate was fully worked out and a sum of Rs 136/- was paid to the Contractor. The - : three incomplete works of the previous year were also executed further and an expenditure of Rs 262-13-8 was incurred on this ~~xxxxxx~~ account. A sum of Rs 80/- was also paid towards the cost of the clearance of rank vegetation in the Kallurkatte Town Municipality, this work having been executed during the last year. This cost was incurred by the Malnad Improvement Committee on account of the limited resources of the Municipality and the sanction of Government was obtained therefor as a special case. The total expenditure on these items of work during the year under report was only Rs 478-13-8, which was met out of the allotment for miscellaneous expenditure in the budget of the Committee.

It

Sinking of drinking water wells and keeping them pure.

It was decided by the Committee to grant wells generally only to villages which were proposed to be shifted on account of their present insanitary condition and also to villages where new settlers from out side the State come and settle themselves in the malnad. A sum of Rs 9,000/- was provided in the budget of the Committee for the above purpose. The sinking of 16 wells (2 in the Shikarpur taluk, 2 in the Sorab Taluk 5 in the Sagar Taluk, 1 in the Nagar Taluk 4 in the Tirthahalli Taluk, 1 in the Kumsi Sub-Taluk and 1 in the Shimoga - - Taluk) at an estimated cost of Rs 11,472/- was sanctioned during the year. The well sanctioned to be sunk in Mumbal, Talaguppa and Timkarpur are intended for the use of the settlers in those villages and the others relate to the cases of shifting of villages. Appendix B is the Statement ~~estimate~~ showing the details of estimates sanctioned, of progress made in the - - execution of the same and of payments made in respect thereof. The progress made in the execution of sanctioned wells works is reported to be of the estimated value of Rs 5735-3-4. The small progress in this respect is due to the serious difficulty in procuring Contractors in the malnad. The soil in most cases is found to be of laterite at the top and loose earth at the bottom. There is - always the apprehension of the wells - - collapsing,

(8)

collapsing, the result being that men do not generally come forward to take up the contract for well works and even if they should, they try to back out of their engagements. Revetment up to the ground level has in most cases been completed.

Bills to the extent of Rs 5095-10-0 were received and a sum of Rs 4562-14-0 was passed for payment to the Contractors, the balance being held in reserve, to ensure the contractors continuing in charge of the work as the construction of parapet wall has advisedly been postponed till after the monsoons.

Besides the above, estimates for the sinking of six wells, which were pending in this Department, were on the recommendation of the Committee sanctioned by the President, District Board out of the allotment, at his disposal from the Rural Water Supply Funds, as estimates for the amount in excess of the allotment provided by the Committee were already sanctioned by this Department. The total amount of estimates sanctioned by the President District Board, as stated above is Rs 4432/-. These estimates were also worked out by this Department and bills sent to the President for being passed out of the Rural Water Supply Funds.

Appendix

Incomplete well works of the previous year.

Appendix C is the statement showing the details of incomplete well works of the previous years and of the progress made in execution of the same as also the amount paid in respect thereof. The first 14 items are cases of sinking of new wells and the last two are those of improving the existing old wells. Eight of these wells have been successfully sunk and have yielded good drinking water. The work of improving the two old wells in the Kumsi Sub-Taluk is also completed. In the case of the other six wells works, revetment up to the ground level is completed and the construction of the parapet walls has been advisedly put off to allow the revetment to settle itself and to stand the test of a monsoon season. Bills to the amount of ₹ 4165-1-8 were received in respect of these well works and were passed for ₹ 3921-2-3, the balance being held in reserve. A small reserve is held in respect of some of the completed well works for payment to the Contractors after inspection of the said works by the Special Revenue Officer. The cost of execution of these works is met out of the allotment provided in the budget of the Committee under the head " Miscellaneous".

The sinking of wells by private agency for public use is also being encouraged by this Department. Such work

was

Shikarpur.
1. Gauga, 2. Channapura.
Nagar.
1. Siveswara, 2. Mavinakoppa.
Tirthahalli.
1. Aklapur, 2. Hadigal,
3. Kesaragutti.

was taken up in two villages in each of the taluks of Shikarpur and Nagar and 3 in the Tirthahalli taluk as per details noted on the margin.

The works in the two villages of the Shikarpur Taluk are also reported to have been completed.

The executive staff employed by the Committee has been instructed to guard against any infringement of the Village Sanitation Rules in respect of the drinking water wells and needful steps are being taken by them.

Timber facilities for house building.

The committee considered that the concessions sanctioned by Government in their Order No. R. 1702-7 Ft. 40-14-3 dated 27th August 1914 (by reducing the rates for timber removed under the Malnad Ryots' Special Privilege Rules) does not reach the poorer classes and made a further - - recommendation to Government for the free grant of timber in cases where villages have to be shifted etc., The Government were in their order No. 6394-9 Sany. 110-15-3 dated 1st March 1916 pleased to - - authorise the Deputy Commissioners of the Malnad Districts to sanction free grants of timber from the District Forests up to a certain maximum in deserving cases where villages in the malnad have to be shifted from their insanitary areas. These concessions were also ordered to be extended to the new settlers in the malnad by - -

Government

Government in their order No. 9201-7 Sany. 99-15-5 dated 8th May 1916. In order to facilitate the speedy disposal of applications for the grant of - - licenses for removal of building - materials, an application was mde by the Special Revenue Officer to the Deputy Commissioner to authorise him to deal with such applications and the Deputy Commissioner was pleased to order accordingly.

Six hundred and seventy eight applications for timber were received during the year and six hundred and twenty five applications were disposed of, leaving a balance of 53 pending with the Amildars. One hundred and twenty seven of the applications - - referred to above were received and dealt with by the Special Revenue - - Officer since March 1916, when he was authorised by the Deputy Commissioner to deal with such applications. In all these 127 cases, mafi licenses were issued subject to the maximum prescribed by Government in their order referred to above. 107 of these - - applications refer to cases of shifting of villages and the remaining - - twenty to those of new settlers. The concessions offered by Government in this reppect are ascertained to have been fully availed of by the ryots.

A

(10)

Improvement of drainage.

A sum of Rs 4000/- was provided in the budget of the Committee towards the cost of execution of minor drainage works and a proposal was submitted by it to Government for sanction to carry out such work by amani system by the employement of 7 gangs 2 for Kumsi Sub-Taluk and one for each of the taluks of Tirthahalli, Nagar Sagar and Sorab and Shikarpur. The sanction of Government to the said proposal having been received too late, it was resolved by the Committee to utilise the said amount for the - - opening of roads and the sinking of wells which in fact has been recorded by Government in their order No. 8853-5 Sany. 87-15-9 dated 17th May 1916.

Four estimates of the aggregate cost of Rs 213/- two in the Shikarpur taluk for the filling up of insanitary pits in two villages, one in the Sagar taluk for the opening of a check drain and another in the Kumsi Sub-Taluk for filling up a collapsed well, were sanctioned during during the year. Three of these estimates were completely worked out and a sum of Rs 160-6-0 has been passed for payment to the Contractors on this account. Out of the balance, the amount needed for the opening of roads was utilised as sanctioned by Government in their

Order

Order referred to supra.

Besides the above, the opening of minor village roads and of check drains etc., was also taken up by the ryots of 57 villages at their own cost at the instance of this Department and the quantity of work executed by them during the year is estimated at Rs 6424-12-0. The number of villages thus dealt with during the year is largest in the Shikarpur Sagar and Nagar taluks being 16,18 and 12 respectively.

Keeping paddy fields away from residential areas.

One village in the Shikarpur taluk, namely, Teppagodu, has been successfully dealt with during the year. Two more villages namely, Hana-gere and Kesarabilu, both in the Bharangi hobli of the Sagar Taluk have been selected for immediate action. Both these are Kunbi Colonies settled by the Forest Department. Hanagere village site is situated quit close to paddy fields and that of Kesarabilu is situated in the centre of the paddy fields. The colonists look very poor in health. These two villages were inspected by the Deputy Commissioner and Chairman in March last in company with the Special Revenue Officer and the Special Sanitary Offic There are now no drinking water wells in these villages and it is quite essenti

that

that wells should be sunk here. The total number of villages successfully dealt with up till now is four. Beside every precaution is being taken in this matter while selecting village sites for villages proposed to be shifted during the year.

Separate accommodation for cattle.

The dangerous effects of tethering cattle in dwelling houses are - - explained to the ryots at the time of the conferences and Taluk and Hobli Committee meetings. Every other occasion, where a large number of ryots assemble, is also being made use of to explain the subject, and the executive staff employed by the Committee have been instructed to give wide publicity to the dangerous effects of this long standing practice and to encourage people to build separate shuds for their cattle. Every precaution in this respect is taken in the cases of villages which are either being shifted or are in the course of shifting.

Extension of Village Sanitation Rules.

The Village Sanitation Rules have been extended to 181 villages during the year under report making the total number of villages in which these rules are in force up to the end on the year into 705. The - - - executive subordinate staff has been instructed to deal promptly with cases of infringement of Village

Sanitation Rules.

Spreading of sound ideas about sanitation.

A series of short articles on Sanitation, Hygiene and simple laws of health etc., were contributed from time to time in the columns of the local kanada weekly paper " Shimoga Vrittanta" and the following leaflets were issued during the year under report:-

1. Improvement of malnad villages.
2. Simple facts on "Pneumonia"(English)
3. -do- "Vaccination" (English.)
4. -do- "Pneumonia " (Kanarese)
5. -do- "Vaccination" (Kanarese)
6. " Food " (English)
7. " Food " (Kanarese)
8. " Malaria" (Kanarese)
9. " Plague " (Kanarese)
10. " Cholera" (Kanarese)
11. " Fatalism"(Kanarese)

The total number of leaflets issued since the beginning of the scheme is fifteen, including the four issued in the previous years. The last four are in the form of ballads and are very instructive. 2,500 copies of each of these were recently received from the press. They will be distributed broad-cost among the rural folk----- shortly.

The number of copies of leaflets issued during the year is 3689 making the total number of copies issued since the beginning of the scheme ~~to be~~ upto 9158.

The cost of printing and translating the leaflets on " Pneumonia" and " Vaccination" amounting to ₹ 159-8-0 was met out of the allotment of ₹ 500/- provided in the budget of the Committee under the head "Dissemination of knowledge on Sanitary Matters"

It was found desirable to get a number of stereoscopic views and also lantern slides showing the local condition of the malnad prepared by ~~the~~ an experienced photographer, and the sanction of Government was obtained therefor. (Vide No. 8092 Sany. 119-15 -2 dated 2nd May 1918.) Dr. Karve, the Special Sanitary Officer, and Mr. - - Vedantaiengar, Photographer of the Education Department, who was deputed for the purpose, travelled together in the malnad parts of the district, and may have taken out 115 stereo views and 17 plates. These have very recently been returned approved to the Inspector General of Education with a request to supply 12 stereo views and one lantern slide of each approved view. As soon as copies of these are received in this office, they will be distributed - - between the Amildars and the Special Sanitary Officer for exhibition to the rural folk. These views are of very great educational value and it is hoped they will be found useful in disseminating knowledge

knowledge on health and kindered subjects to the rural folk. As the copies of proofs were recently returned approved and an indent made for the supply of spare copies, the cost of preparation of these and other expenditure incidental thereto could not be adjusted out of the funds for the year[1915-16]. This will be done in the course of the year 1916-17. Matters connected with food, clothing, use of quinine, utility of vaccination etc., were explained to the people by the Special Sanitary Officer and Special Revenue Officer during Malnad Improvement Conferences in taluks and Malnad Improvement Committee meetings and also during tours. Besides, the executive staff has also been devoting special attention to this branch of the committee's work.

The conversion of the existing Local Fund Dispensaries at Ananthapur Humachadakatte and Megaravalli into semi itinerant ones was sanctioned by Government in their order No. 4742 -5 Med. 16-15-17 dated 31st December 1915 and these were started on the dates noted on the margin against the name of each Villages within a radius of eight miles from each dispensary have been included within its range and the Sub-Assistant Surgeon in charge

Ananthapur 19-2-1916.
Humachadakatte 24-1-1916.
Megaravalli 20-2-1916.

charge of each such dispensaries has also been supplied with a map showing the situation of such villages. The Senior Surgeon has in his letter No. 3288 dated 20th June 1916 intimated that a sum of R 642-4-6 has been expended towards the cost of tents and rattan boxes supplied to Sub-Assistant Surgeons in charge of these semi-itinerant Dispensaries. The following is the statement showing the details of work done by the three sub-assistant Surgeons since the starting of these semi-itinerant Dispensaries.

Items of work.	Anantapur	Hunsebadakatte	Hegaravalli.
1. No. of villages visited.	54	101	96
2 No. of days itinerated.	60	111	36
3. No. of lectures on simple diseases and sanitation.	120	50	36
4. No. of patients treated.	1556	7902 A	729

A. Includes figures of Head-Quarter Dispensaries at Nagar and Tirthahalli.

Appendix D is the statement showing the number of patients treated under several diseases.

Further, a recommendation was made by the Committee in the matter of weekly visits by the Sub-Assistant Surgeon at Kumsi to Haranahalli, and the proposal has recently been sanctioned tentatively for a period of six months.

Distribution of quinine.

A provision of R 2000/- was made in the budget of the Committee towards the free distribution of quinine and esanofele pills. A supply to the value of R 1970 was received on indent from the

Medical Stores and arrangements made through the Comptroller to adjust the cost thereof.

The number of quinine pills on stock on 1st July 1915 was 59,500 and 165,000 pills were received during the year from the Medical Stores making the total of 224,500 pills. Of these, 195,560 pills were distributed free to malaria striken people in the malnad, the number of pills on stock on 1st July 1916 being ~~28,940~~ 28,940. Besides these, 9,900 pills of esanofele were also received from the Medical Stores and 7,740 pills were distributed during the year leaving a balance of 2160 pills at the close thereof.

The number of quinine and esanofele pills issued since the beginning of the Scheme is 309,210. Nearly 2/3 of this number was distributed during the year 1915-16. It is seen therefrom that there is a growing demand for these pills. These are very popular and their use is appreciated even in the remotest corner of the malnad portions of the district. These pills are distributed by the Amildars and the executive subordinates of the Committee as also by the Special - - Revenue Officer and the Special Sanitary Officer during tours in the district. Leading Land-lords and

representative

representative ryots in taluks including District Committee members were entrusted with this work. The help of the Sub-Assistant Surgeons in charge of the Semi-itinerant - - Dispensaries and also of the Village School Masters was also enlisted in popularising the distribution of this pills. Further there is a proposal to organise " Malaria vigilence Committees" at convenient centres and these committees, when formed, will be useful in distributing quinine and in popularising the measure.

Promotion of vaccination.

The retention in service for a further period of one year of the vaccinators (trained and employed by the committee) was sanctioned by Government in their order No. 144-8 Sany. 94-14-4 dated 9th July 1916. These have been working in the taluks of Shikarpur Sorab, Nagar, Sagar and Tirthahalli and in the Sub-Taluk of Kumsi. The work of these vaccinators is supervised by the Special Sanitary Officer. 1673 cases of vaccination were attended to by these vaccinators and 1379 of these cases were successful, being 82,4% of the total number vaccinated The vaccination work is gaining - - popularity in the malnad. The statement giving details of vaccination work done by these temporary Malnad - - -

Improvement

Improvement Vaccinators during the calendar year 1915 was recorded by the Committee at its meeting held on the 15th May 1916 with the observation that the work done by the Vaccinator attached to the Kumsi Sub-Taluk was very poor and that his services may best be employed in two other taluks viz Sorab and Tirthahalli by rotation for a few months in the year. The Special Sanitary Officer has been requested to take needful action in the matter.

One Manjanatha Prasad, a Vaccinator trained at the cost of the committee and employed in the Sorab taluk was dismissed from service on account of his bad work. A penalty of ₹ 20/- together with the amount spent on his travelling viz ₹ 7-15-0 was ordered to be recovered from him. The charges incurred on account of pay etc., of the six vaccinators employed by the Committee is ₹ 898/-.

Increase of midwives and nurses.

The four pupil midwives trained at the cost of the committee are attached to the Local Fund Dispensaries at Shikarpur, Honnali, Tirthahalli and Humachadakatte and the number of labour cases conducted by them ever since their employement during the year is 47, 86, 55 and 12 respectively, the total number of cases conducted by all

of

of them being 200. Four more pupils were selected and sent for training in midwifery to the maternities at Mysore and Bangalore on a monthly stipend of ₹ 15/- each. One of these was sent back by the Senior Surgeon on account of her pregnancy and the other three are now undergoing training. For want of accomodation not more than four could be trained at a time. No further action could be taken in the matter of the training of local nurses in midwifery till the proposed maternities are opened in important centres of the malnad. Efforts are being made to enlist private sympathy for the construction of maternity buildings.

Expansion of communications.

Railways.

The subject of the construction of the proposed railway from Shimoga to Sagar and Tirthahalli is receiving the attention of the District Board and Government.

Roads.

The construction or improvement of the following roads at an estimated cost of ₹ 4,500/- was undertaken by the Committee during the year under report:-

(1) The construction of a road from Nagar to Sampikatte at an estimated cost of ₹ 2,000/-

(2) The improvement of the road - - between Talaguppa boundry and Jog lying

lying within the Mysore territory at an estimated cost of Rs 500/-.

(3) The opening of a road from Jog to Aralgode-Honni Ghat-road at an estimated cost of Rs 1000/-

&(4) The opening of a road from - - Hubli to Ilibilu and Nagodi at an estimated cost of Rs 1000/-.

The execution of the first two roads, named above, was entrusted to the - - Public Works Department, and the cost thereof was drawn and transferred to the credit of that Department by debit to Malnad Improvement Funds and credit to Public Works Department.

The estimates for the opening of the ~~xxxxx~~ other two roads were sanctioned during the latter part of May 1916 and the Sub-Overseer, Sagar was placed on special duty under the Amildar for the execution of these two roads. These roads are calculate to be very useful to the people ~~of~~ in the interior of the Bharangi hobli ~~of~~ the Sagar taluk. Owing to the unexpectedly early outbreak of the monsoon this year in the months of May ~~and June~~ no substantial progress could be made on these works. Only the priliminary jungle clearing work and demarcation of the road could be attended to. Bills amounting to Rs 199 were received for these works A

sum

50

sum of ₹ 160/- was passed for payment to the Contractors. The total amount spent on roads during the year is - - ₹ 2,660. This was met out of the funds provided in the budget of the committee for minor drainage work by reappropriation as resolved by the committee at its meeting held on the 22nd March 1916.

The want of communications is keenly felt in the malnad. Any progress in this direction is one of the surest means of improving the economic condition and industrial development of the malnad. The District Board has been again urged to obtain early sanction of Government to the programme of roads submitted by it. A special programme of roads urgently required for the malnad has been drawn up by this Committee and a reference has been made to Government in the matter

Attraction of settlers.

The question of the attraction of settlers to the malnad was engaging the attention of the Committee since the beginning of the scheme. Lists of assessed waste lands available for cultivation in the malnad taluks of Sagar, Nagar and Tirthahalli were got printed and distributed among people intending to settle. Similar lists for the remaining semi-malnad taluks are under Compilation and printed

copies of the same will be got ready soon. Definite proposals were submitted by the Committee for the grant of assessed waste lands for cultivation for settlers on alve/ tenure and for the grant/of loans to such of them as may require for the purchase of ~~the~~ agricultural stock and implements and the sanction of Government was accorded to the same intheir order No. 8201-7 Sany. 99-15-5 dated 8th May 1916. These concessions have been sanctioned tentatively for ~~the~~ a period of one year. Further, a sum of Rs 5,000/- was placed at the disposal of the Committee for the grant of loans to settlers on the surety of local men, and the Special Revenue Officer was authorised to deal with such applications. On a further representation of the Committee, the rules/ requiring local sureties for settlers applying for loans was - - ordered to be relaxed and the Special Revenue Officer was authorised to make advances on the joint security of all the settlers in cases where such encouragement was deemed necessar subject to a limit of Rs 1000 per year, vide ~~Government~~ Government order No: 9272-7 Sany. 99-15-7 dated 21st June 1916. The following is the statement showing the extent of landgranted to

several

52

several settlers on alve tenure in the three taluks of Shimoga, Sagar and Nagar as also the amount of loan advanced to them for the purchase of agricultural stock etc.

No.	Taluk.	Village	No. of families	Extent of land granted	Amount of Re-loan paid.	marks.
1.	Shimoga	Timkapur	11	34-39	-	-
2.	Sagar	Mumbal	13	78-19	405	At Rs 45/- each to 9 settlers
3.		Talaguppa	16	55- 7	1200	At Rs 75/- each
4.		Achapur	3	5-25	-	-
5.		Sydur	3	15-12	-	Gomal
6.		Heremane	1	3-12	100	-
7.	Nagar	Mudagoppa	4	4-16	200	At Rs 50/- each.
8.		Masakalli	4	15-31	200	At Rs 50/- each.
		Total	55	213-1	2,105	

The land allotted to the settlers at Sydur is a Gomal land and the - - Amildar Sagar has been requested to deal with their applications under the ordinary darakhast rules. The lands in other cases are all assessed Government waste lands. The settlers have been put in possession of the -- portions of the land allotted to each of them and several of these have - - begun their agricultural operations.

In the case of settlers at Mumbal Mudagoppa

Mudagoppa and Masakalli, the loans have been sanctioned on the joint - - security of the settlers and in the other two cases on the security of ~~local~~ local responsible sureties. Mr. - - Chandavar Subba Rao through whom the settlers at Taluguppa were brought, has stood surety for 15 of them and Manjasetti, Patel of the village for the remaining one settler. The - - ~~Shanubog~~ Shanbhog of Talaguppa has stood - - surety for Keremane settlers.

The information from the Comptroller placing the requisite funds for the grant of loans having been received in the Treasury Department rather late, the full allotment could not be - - ~~utilised~~ utilised and the requisition from some of the settlers for loans had to be put off unattended to on this account.

The attraction of settlers through private agency is also being encouraged. Messrs Kudagunji Ramappa and - - B.V. Shirali have each promissed to settle 50 families and have applied for the grant of loans to the extent of Rs 4000/- and 5000/- respectively. These are respectable enterprising gentlemen and the matter regarding the grant of loans is under correspondence Mr. Ramappa has, it is learnt, already settled 10 families in his village. Applications from persons from the Madras and Bombay Presidencies are

also

also being received and the information wanted by the applicants has all been supplied to them. The scheme has been gaining popularity and the settlers have begun to come.

Improved Registration of vital statistics.

Revised rules for the proper registration of vital statistics have been issued by Government in their order No. 6664-714 Sany. 71-15-3 dated 10th March 1916. These registers serve as an index to the - - health of the villages and are being checked by the officers of the Committee to ensure some measure of accuracy.

A proposal was put forth before the Central Committee for the taking of census in selected localities twice a year, so that some correct - - data may be arrived at with regard to the variation of births and deaths of the natives of the malnad, but it was vetoed by 6 to 5.

Relief of agriculturists from their avoidable indebtedness.

A Sub-Committee was appointed by the Central Committee to discuss and formulate a scheme for the purpose of relief of agrarian difficulties. The draft bill for a special legislation and a draft scheme for the establishment of a Land Bank submitted by the Sub-Committee were approved by the Central Committee and the same has been recommended to Government for sanction, and their orders are awaited.

Further

of the District Committee

Further the proposal for a fixed deposit of Rs 20,000/- by Government in the Peoples' Bank at Tirthahalli at 4% simple interest has also been submitted to Government for reconsider- -tion and their orders are being await- ed, ~~by the District Committee~~.

Establishment of model villages.

A proposal to provide at least one house as a model in each thickly populated village at Government cost has been pending the sanction of - - Government. Further a proposal has also been submitted to ~~Government~~ Government for extending the scope of Takavi Rules to persons desirous of building sanitary houses and of sinking ~~wells~~ drinking water wells.

Facilities for cattle grazing fuel, timber etc.

No complaints in these matters were received during the year under report. The committee was of opinion that the growing of Yennegar Jola, a fodder crop, should be encouraged in the malnad and that the establish- ment of Veterinary ~~Dispensaries~~ Dis- pensaries in the taluks of Shikarpur Nagar, Sagar and Tirthahalli and in the Sub-Taluk of Kumsi was necessary. A sum of Rs 50/- was proposed to be spent for this purpose. The seeds of Yennegar Jola have been purchased and will be distributed among the malnad ryots very shortly. Further a pro- posal has been submitted to the - -

Revenue

Revenue Commissioner in the matter of starting of Veterinary Dispensaries at the places referred to above.

Abatement of intemperance.

A reduction in the ~~matter~~ number of arrack shops and extra precautions against illicit tapping are considered necessary to the end in view. This question was discussed both at the District and Central Committee Meetings and it was resolved that itinerant lecturers be appointed to preach against intemperance and it was also thought necessary to reduce the number of arrack shops and at the same time to take extra preacautions against illicit tapping. The sanction of Government and the Inspector General of Education for the employment of such lecturers has been received and a set syllabus is under ~~the~~ consideration of the Committee for being issued to these lecturers. Needful reference has also been made to the Excise Commissioner and the District Excise - - Officer in the matter of the reduttion of the number of arrack shops and extra precaution against illicit distilation. Advantages will also be taken of the employement of such lecturers for the dissemination of - - knowledge on simple laws of health, social evils superstitious beliefs etc

The

Sanitary Department.

Malaria research work.

The question of a malarial survey which was being all along discussed by the Committee was not sanctioned by Government and a disease survey was ordered to be takenup. Accordingly the Committee resolved at its meeting held on the 22nd March 1916 that the disease survey of Aralgode and village within a radius of six miles therefrom in the Sagar Taluk be taken up this year. The Special Sanitary Officer was deputed for this work and the services of the Sub-Overseer, Sagar were temporarily placed under him in this connection. It is learnt that the disease survey has been completed and the report of the Special Sanitary Officer is being awaited.

A sum of Rs 400/- was provided in the budget of the Committee for the purchase of a ~~Microscope~~ portable Microscope with accessories, but the supply of the same could not be obtained on account of the war conditions. Consequently the amount had to lapse.

Education Department.

1. Increase of primary schools.

Forty nine Government Schools and 83 grant-in-aid schools have been started in the district since the beginning of the scheme. Steps are also being taken by this Department to

to recommending the starting of new schools in places, where they are in the opinion of the Special - - Revenue Officer urgently called for.

Special industrial schools

The opening of an industrial school at Shimoga has been recently sanctioned by Govt. The Pattan School at Agumbe which was started by this Department has since been transferred to the Education Department as per instructions contained in Government order No. 8690-3 Dany. 121-15-2 dated 27th May 1916. Besides these, carpentry ~~xxx~~ classes were opened in the A.V. Schools at Shikarpur, Tirthahalli and Shimoga and a sinthy class in the A.V. School at Shikarpur.

The starting of an industrial school and work shop at Tirthahalli on a joint-stock basis with a capital of Rs 10,000/- is under contemplation and the shares have almost been completely subscribed for. Even the initial deposit has been paid in most cases and steps will be taken to register the company. The sale of the Musafurkhana building at Tirthahalli for holding the said school has also been sanctioned by Government in their order No. 7515-20 I.E. 38-15-4 dated 7th April 1916. The opening of a similar institution at Kallurkatte has also been taken up by the Taluk Committee for Malnad Improvement of the

Nagar taluk and it is proposed to register the Society under the Co-operative Societies Regulation.

edical inspection of schools.

A scheme for the medical inspection of schools has been sanctioned and the work is being attended to by the Special Sanitary Officer.

Physical culture.

Gymnastic Instructors have been appointed to the A.V. Schools at Shimoga, Kallurkatte and Sagar.

Easy books on Hygiene.

Hygiene is now being taught in all Lower Secondary Schools as an optional subject and a revised book in Kanada is intimated by the Inspector General of Education as being in the course of compilation.

Special scholarships.

The Inspector General of Education has intimated that a general scheme for the grant of scholarships in the High School classes is pending before Government.

An allowance of Rs 2/- to each of the teachers serving in the malnad has been recently sanctioned by Government.

orest industries and commerce

Department.

Encouragement of development of industries.

No information was furnished by the Director of Industries and Commerce in this matter and a reference has been made to Government in this ~~matter~~ connection.

Encouragement of Co-operative enterprise.

Twelve more Co-operative Societies were started during the year, 8 in the Tirthahalli Taluk, 3 in the Sagar taluk and one in the Sorab taluk. The - -

registration

registration of two societies in the Sagar taluk ~~are~~ intimated by the - - Registrar of Co-operative Societies to have been cancelled as there was no likelihood of their working, due - - mainly, to party feelings among the people. The other societies are intimated to be doing good work. The Registrar of Co-operative Societies has further intimated that vigorous attempts are being made to organise fresh societies wherever possible.

With a view to popularize the scheme and to secure the co-operation of the people in regard to its practical working in the interior portions of the district. Taluk conferences were held during the year at Channagiri, Shikarpur, Sagar, Kallurkatte and Tirthahalli. Several important subjects - - affecting the Economic Improvement of the malnad were discussed at length from different points of view. Taluk and hobli committees have also been formed to serve as branches to the District Committee. It may also here be remarked that a hand printing press invented and manufactured by one Mr. K.V. Gundu Rao of Sagar was exhibited at the conference held in June 1916 and that it elicited the keenest interest of the spectators.

A very instructive and interesting

Health

Health Exhibition and a series of popular lectures were organised by one Mr. Krishna Rao son of Sowcar Mr. Narasimhaiah of Nagar. The whole function was organised by private enterprise, and it was very much appreciated by the ryot population of Nagar and its surrounding villages.

A rough scheme for the organisation of labour recruiting depots to ensure a satisfactory supply of desirable labour in the malnad was drawn up by the Special Revenue Officer and placed before the Central Committee for the Improvement of the malnad.

Thus far, the scheme has been - - making head-way in spite of difficulties in the shape of non-availability of qualified competent and experienced subordinates for the executive staff, and realiable contractors. Moreover, owing to the temporary nature of the work and the peculiar difficulties in the malnad, it is difficult to get subordinates to stick to their posts.

Deputy Commissioner & Chairman
Malnad Improvement Committee,
Shimoga District.

Appendise A

Statement Showing details of Expenditure and lapses in [illegible] sanctioned allotment for the year 1915-16. on account of Malnad improvements.
